Tom, please see the attached communication from Pete regarding our meeting from July 9.

Best wishes,

John Prince

Subject: Yesterday's Newtown meeting

Pete & John – Thanks for taking the time to meet with our group yesterday, we thought it was a very productive session and look forward to continued development of the Early Action/Accelerated Remedy. We have some work ahead of us to figure out how we can develop a scientifically sound approach to incorporating background and the East River's connectivity to the lower segment into a metric that all parties feel is reasonable for developing both the remedial action as well as the monitoring. We appreciate this approach will resolve your need to not set a PRG this early in the overall process, and at the same time give us the latitude to move forward with an accelerated remedy for that portion of the Site. We will begin exploring technical approaches for developing an appropriate metric(s) and will be back in touch with you when we are in a position to discuss that further with you. In the meantime, if you have any further insights or suggestions around a metrics approach, please let us know. Thanks, Tom

Tom Schadt
